Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 – 4, 9 – 10, 13 – 14, 18 – 21, 24 and 27 - 28 are rejected under 35 U.S.C. 102

(b) as being anticipated by Stuart (US 5,031,330).

Stuart discloses an inclinometer for measuring the angle between a reference angular position and an angularly adjustable surface comprising a pair of accelerometers (70, 72) for sensing the gravitational vector of the earth providing an output signal from each accelerometer; centering devices / clamping devices (78) for referencing the accelerometers to the surface; a data processor / CPU (94) for receiving the output signals from the pair of accelerometers to determine first reference position, to determine second adjusted position and determine an angle between the first reference position and the second adjusted position; and a display as part of said CPU for receiving information from the data processor and for displaying the angle of the surface as determined by the data processor. Stuart discloses the adjustable surface includes a fixed portion and an angularly adjustable portion of an aircraft, since the device could be mounted on any desired surface of the aircraft to be tested.

With respect to the preamble of the claim : the preamble of the claim does not provide enough patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self – contained description of the structure not depending for completeness upon the introductory clause. *Kropa v. Robie*, 88 USPQ 478 (CCPA 1951). Furthermore, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *In re Schreiber*, 44 USPQ2d 1429 (Fed. Cir. 1997).

Allowable Subject Matter

3. Claims 15 - 17 allowed.

4. Claims 5 – 8, 11 – 12, 22 – 23 and 25 – 26 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are considered of relevance to the present application :

- a. Stover (US 3,924,461)
- b. Eriksson (US 3,469,322)
- c. Sekino et al. (US 6,076,269)
